- Amazon Music for Artists
- Apple Music for Artists
- Facebook Ads Manager
- Google and YouTube

Release a supporting single on May 25, 2025

Keep your algorithmic energy going with [a follow-up song!](#)

READY?

RELEASE MUSIC THE RIGHT WAY!

1. Keep ALL your music available online with no annual fees.
2. Find a global audience on 150+ platforms.
3. Make the most money with sync, publishing, social videos, and more.

GOT MORE TIME BEFORE YOUR RELEASE?

Sweet! Do these things too.

Document The Creative Process

Capture video and take pics. Also, keep detailed notes about:

- The meaning of the lyrics
- The story of the recording
- The gear you used
- Working with collaborators

This stuff will come in handy later for promo content and social posts.

Figure Out Your Story

Find your hook for press & playlisters by asking:

- Who is your ideal listener?
- Why do they need your music?
- [What makes you unique as an artist?](#)

Distill that into an elevator pitch! You'll have a leg up in your promotion.

Book your release party

Celebrate your album live with both online and IRL performances, including:

- [Livestream concerts](#)
- A special “album release” gig or tour
- Listening parties on Instagram Live, Twitter, etc.
- Behind-the-scenes VIP experiences

Plan ahead so you can host a memorable event for your fans; music venue talent buyers often need 3-6 months to get you on the calendar.

Get more from every recording session

Before you close down your session or leave the studio:

- Burn instrumental mixes for [sync licensing](#)
- Print stems for remixers
- Try a stripped-down alternate mix

Save yourself the time later by doing this stuff NOW.

We'd appreciate your feedback with this [really short survey](#)! Thank you!
